

**Environmental effects on buildings, structures and people -
investigations, studies, applications / edited by Andrzej Flaga. – Kraków,
2016**

Spis treści

PAWE monographs series	4
Preface	5
I AERODYNAMICS OF BUILDINGS AND STRUCTURES	
<i>Andrzej Flaga</i> Generalized quasi-steady model of critical feed-backs between a vibrating slender object and the wind	9
<i>Jarosław Bęc, Andrzej Flaga</i> Numerical implementation of quasi-steady models of turbulent wind action on guyed masts	21
<i>Andrzej Flaga, Grzegorz Bosak, Tomasz Lipecki, Jarosław Bęc</i> Experimentally aided design of three atypical footbridges	53
<i>Andrzej Flaga, Tomasz Michałowski</i> An analysis of the susceptibility of different light footbridges to wind effects	87
<i>Andrzej Flaga, Agnieszka Porowska, Marian Krężel</i> Analysis of the influence of vortex excitation on hanger damage of the arched viaduct in Ryto, Poland	105
<i>Andrzej Flaga, Piotr Krajewski</i> Analysis and comparison of the aerodynamic characteristics of selected cable-stayed bridges in Poland	119
<i>Andrzej Flaga, Piotr Matys</i> Approximate estimation and comparison of the torque and power of horizontal axis wind rotors and vertical axis wind rotors	133
II WIND ACTIONS AND SNOW LOAD TESTS IN A BOUNDARY LAYER WIND TUNNEL	
<i>Łukasz Flaga, Marcin Augustyn, Renata Kłaput, Andrzej Flaga</i> Wind tunnel model tests of large-size vertical façade shading panels of the Green Wings Office Building in Warsaw	143

Andrzej Flaga, Renata Kłaput, Agnieszka Porowska
Influence of aerodynamic interference on two high-rise buildings
in Warsaw, Poland 153

Łukasz Flaga, Grzegorz Bosak, Renata Kłaput, Andrzej Flaga
Wind tunnel tests of the operating state of chimneys and ventilations
draughts for a building in two stages of compact development:
before and after superstructure realization 171

Andrzej Flaga, Grzegorz Kimbar, Łukasz Flaga
Wind tunnel tests of snow load distribution on the roof of the Municipal
Stadium in Łódź, Poland 183

III REDUCTION OF BUILDINGS/STRUCTURES VIBRATIONS CAUSED BY THE WIND

Andrzej Flaga, Piotr Wielgos
Numerical implementation of optimization issues of multiple tuned
mass damper parameters 199

Piotr Wielgos, Andrzej Flaga
The optimization problems in determining parameters of tuned mass
dampers 231

IV VIBRATION COMFORT CRITERIA FOR PEDESTRIANS ON FOOTBRIDGES

Andrzej Flaga, Marek Pańtak
Vibration comfort criteria for pedestrians on footbridges 263

Andrzej Flaga, Marek Pańtak, Tomasz Michałowski
Examination of own human comfort criteria for footbridges in case
of wind-induced vibrations 271

V SIMILARITY CRITERIA FOR SOME MODEL TESTS

Andrzej Flaga
Similarity criteria for linear building objects at aerodynamic
and gravitational actions 285

Andrzej Flaga, Agata Szeląg
Dimensional analysis and similarity criteria for the model tests of sound
transmission through simple partitions 295

VI OTHER ENVIRONMENTAL INFLUENCES ON BUILDINGS, STRUCTURES AND PEOPLE

<i>Mariusz Maślak</i>	
Modeling of a fire development in a building compartment	307
<i>R.I. Kinasz, Ya.S. Huk</i>	
Determination of the maximum depth of soil freezing for the territory of the Ukrainian Carpathians	319
VII APPENDIX	
Wind Engineering Laboratory with a boundary layer wind tunnel at the Cracow University of Technology	341

oprac. BPK
