

Spis treści

Part I Physical Processes

1 Basic Physical Processes in Rivers <i>John D. Fenton</i>	3
2 Turbulence in Rivers <i>Mário J. Franca and Maurizio Brocchini</i>	51
3 Principles of Mechanics of Bedforms <i>Domenico Ferraro and Subhasish Dey</i>	79
4 Scour Problems Downstream of Low-Head Hydraulic Structures <i>Stefano Pagliara and Michele Palermo</i>	99
5 Current Research and Challenges Related to Shallow Flows <i>Wim Uijttewaal</i>	121
6 One-Dimensional Modeling of Flows in Open Channels <i>Dariusz Gąsiorowski, Jarosław J. Napiórkowski and Romuald Szymkiewicz</i>	137
7 Modeling of Floods—State of the Art and Research Challenges <i>Roger Moussa and Bruno Cheviron</i>	169
8 Numerical Modeling of Free-Surface Flows in Practical Applications <i>Mario Oertel</i>	193
9 Laboratory Models of Free-Surface Flows <i>Daniel B. Bung</i>	213
10 Measurements of Turbulence Structure in a Compound Channel <i>Adam Paweł Koziół and Janusz Kubrak</i>	229
11 Uncertainty Analysis in River Modelling <i>Jord J. Warmink and Martijn J. Booij</i>	255

Part II Fluvial Processes

12 Channel Stability: Morphodynamics and the Morphology of Rivers <i>Michael Church</i>	281
--	-----

13 Principles of Bedload Transport of Non-cohesive Sediment in Open-Channels <i>Rui M.L. Ferreira, Marwan A. Hassan and Carles Ferrer-Boix</i>	323
14 Recent Advances from Research on Meandering and Directions for Future Work <i>Ana Maria Ferreira da Silva</i>	373
15 Fluvial Processes in Braided Rivers <i>Nicola Surian</i>	403
16 Lagrangian Modelling of Saltating Sediment Transport: A Review <i>Robert J. Bialik</i>	427
17 Runoff Generation and Soil Erosion After Forest Fires from the Slopes to the Rivers at a Basin Scale <i>Antonio Velasco and Xavier Úbeda</i>	443
Part III Environmental Processes	
18 Ecological Thresholds and Resilience in Streams <i>Robert H. Hilderbrand and Ryan M. Utz</i>	461
19 Coupling Biological and Physical Processes: The Ecological Significance of River Channel Hydraulics and Fluvial Dynamics <i>Chris Gibbins</i>	479
20 Why Do We Need Bankfull and Dominant Discharges? <i>Artur Radecki-Pawlik</i>	497
21 Hydrodynamics of Vegetated Channels <i>Jochen Aberle and Juha Järvelä</i>	519
22 Hydraulic Influences on Dispersion and Reaeration in Rivers <i>J. Russell Manson and Steve G. Wallis</i>	543
23 Exchange of Pollutants Between Rivers and the Surrounding Environment: Physical Processes, Modelling Approaches and Experimental Methods <i>M. Zaramella, A. Bottacin-Busolin, M. Tregnaghi and A. Marion</i>	567
24 Thermal Pollution in Rivers—Modelling of the Spread of Thermal Plumes <i>Monika B. Kalinowska and Paweł M. Rowiński</i>	591
