

Boulder ramps : selected hydraulic, environmental and designing problems : the case of Polish Carpathian streams / Artur Radecki-Pawlik, Karol Plesiński. – Kraków, 2017

Spis treści

Preface	5
 CHAPTER 1	
Boulder ramps within mountain stream channels: selected exploitation and hydraulic problems	7
1.1. Introduction	7
1.2. Artificial block ramps with increased roughness	8
 CHAPTER 2	
Mountain stream hydrodynamics within the region of the interlocked-carpet boulder block ramp - Porębianka stream example	15
2.1. Introduction	15
2.2. Description of the catchment and research facility	17
2.3. Research methodology	19
2.4. Results, discussion and conclusions	23
 CHAPTER 3	
Comparative study of interlocked-carpet block ramp made of natural stone and block ramps of Peterka type	51
3.1. Introduction	51
3.2. Research methodology	55
3.3. Research results, discussion and conclusions	55
3.4. Practical recommendations	59
 CHAPTER 4	
Sediment transport processes related to the operation of block ramps in a mountain stream channel	60
4.1. Introduction	60
4.2. Study area	61
4.3. Methodology	63
4.4. Results and discussion	67
4.5. Conclusions	77
 CHAPTER 5	
Example of block ramp reconstruction on Brennica river	78
5.1. Introduction and the aim of the chapter	78
5.2. Conclusions	83

CHAPTER 6

Distribution of maximum velocities and froude numbers along the block ramp chute

85

6.1. Introduction

85

6.2. Methods

86

6.3. Results

89

6.4. Conclusions

93
