

**Nano-design of zeolite-based catalysts for selective conversion of
biomass into chemicals / Izabela Czekaj, Natalia Sobuś. – Kraków, 2018**

Spis treści

Preface	9
1. Introduction	11
2. Biomass	13
2.1. Processing of lignocellulosic biomass	16
2.1.1. Physical methods of biomass processing	16
2.1.2. Conversion of lignocellulose with ionic liquids	16
2.1.3. Physico-chemical methods of biomass processing	17
2.1.4. Thermochemical processing of biomass	18
2.1.5. Chemical processing of biomass	31
2.1.6. Biological biomass processing	31
2.1.7. Catalytic conversion of biomass	32
2.1.8. Depolymerization of polysaccharides with the participation of catalysts	32
2.1.9. Catalytic conversion of biomass fermentation products	32
2.2. Bio-refinery concept	33
2.2.1. Biorefineries with input from the whole plant	34
2.2.2. Biorefineries with input from inedible parts of plants	34
2.2.3. Biorefineries with lignocellulose input	34
2.2.4. Two-platform biorefineries	35
2.3. Selective conversion into chemicals	35
2.3.1. Production of polyols and other chemical compounds from lignocellulosic biomass	35
2.3.2. Hydrogenation and hydrogenolysis of cellulose biomass	35
2.3.3. Hydrogenolysis of sugars and sugar alcohols	36
2.3.4. Hydrogenolysis of glycerol	37
2.3.5. Conversion of glycerol to 1,2-propanediol and 1,3-propanediol	37
2.3.6. Fructose: aldo-keto isomerization of glucose	38
2.3.7. 5-hydroxymethylfurfural and furfural	40
2.3.8. Levulinic acid and γ -valerolactone	43
2.3.9. Adipic acid	45
2.3.10. Hydrogenation of succinic acid	46
2.3.11. Hydrogenation of itaconic acid	47
2.3.12. Dihydroxyacetone	48
2.3.13. Lactic acid / alkyl lactates	48
2.3.14. Acrylic acid and alkyl acrylates	50

3. Zeolites	55
3.1. Zeolite structure	55
3.2. Synthesis	59
3.3. Metal substitution in zeolites	75
3.4. Characterization	77
3.5. Theoretical modeling of zeolites	78
3.6. Hierarchization of zeolites	83
3.7. Modeling of hierarchical zeolites	91
3.8.3D printing of zeolite models	97
4. Zeolites for biomass conversion	101
4.1. Experiments	101
4.2. Theoretical modeling	102
5. Conclusions and future	107
References	109
