

**Selected issues of special steel structures : chimneys, silos, tanks /
Tomasz Michałowski, Marek Tomasz Piekarczyk. – Kraków, 2019**

Spis treści

Preface	5
1. Introduction	7
1.1. Definition of special metal structures	7
1.2. Shell structures and bar structures - a brief comparison	12
1.3. Reliability of structures	16
1.4. Limit states	22
1.5. Type of analysis	35
2. Loads	37
2.1. Types of loads and actions	37
2.2. Dead load	37
2.3. Snow load	37
2.4. Wind action	39
2.5. Overpressure and negative pressure	44
2.6. Liquid action	45
2.7. Granular solid action	45
2.7.1. General rules	46
2.7.2. Slender silo	54
2.7.3. Intermediate slenderness silo	64
2.7.4. Squat silo	68
2.7.5. Retaining silo	69
2.7.6. Bottom part	69
2.8. Corrosion and attrition	74
2.9. Thermal action	74
3. Vertical cylindrical tank - design example with comments	75
3.1. Initial assumptions	75
3.2. Description of structure	75
3.3. Reliability of tank	76
3.4. Loads	78
3.5. Preliminary analysis	80
3.6. Numerical model	82
3.7. Results of numerical calculations	84
4. Steel chimney - design example with comments	90
4.1. Initial assumptions	90
4.2. Description of structure	90

4.3. Reliability of chimney	91
4.4. Loads	92
4.5. Dynamic and static analysis	96
4.6. Numerical model	99
4.7. Results of numerical calculations	99
5. Steel silo - design example with comments	114
5.1. Initial assumptions	114
5.2. Description of structure	114
5.3. Reliability of silo	115
5.4. Loads	116
5.5. Additional aspects of analysis	117
5.6. Numerical model	119
5.7. Results of numerical calculations	119
References	124
List of tables with explanations	129
List of figures with explanations	133
List of symbols	138
Summary in Polish	159

oprac. BPK
