

Modern polymeric materials for environmental applications. Vol. 6, 6th International Seminar Kraków, 27-29 April 2016 including COST MP1206 Workshop 'Electrospinning vs traditional polymer processing methods : comparison of innovative technical applications' / edited by Krzysztof Pielichowski. – Tarnow, 2016

Spis treści

Preface	I
Contents	III
Electrospun nanofibrous filtration membranes for water purification Application <i>Elif Gamze Aygün, Nagihan Okutan, Filiz Altay</i>	1
Synthesis and properties of magnetic nanoparticles stabilized with nanogold shells <i>Katarzyna Bialik-Wąs, Bożena Tylińczak, Dorota Walczyk, Mieczysław Zaczek, Agnieszka Sobczak-Kupiec</i>	11
Characterization of acrylic hydrogels containing chitosan and gold nanoparticles <i>Katarzyna Bialik-Wąs, Bożena Tylińczak, Magdalena Kulig, Anna Drabczyk, Dagmara Malina, Agnieszka Sobczak-Kupiec</i>	17
Liquid crystallinity in polymers - liquid crystalline polyurethane elastomers <i>Artur Bukowczan, Edyta Hebda, Krzysztof Pielichowski</i>	23
UV ageing of polyurethane foams modified by polyhedral oligomeric silsesquioxanes (POSS) <i>Artur Bukowczan, Edyta Hebda, Joanna Pagacz, Jan Ozimek, Krzysztof Pielichowski</i>	29
Effects of nanofillers on plant protein based bionanocomposites for food packaging applications <i>Turgay Çetinkaya, Filiz Altay</i>	35
Melamine Diborate - a New, Ecological Source of Oligoetherols and Polyurethane Foams of Enhanced Thermal Stability and Low Flammability <i>Ewelina Chmiel, Jacek Lubczak</i>	47

Metasilicic Acid - a New Source of Oligoetherols and Polyurethane Foams <i>Ewelina Chmiel, Jacek Lubczak</i>	57
Synthesis of the urethane-styrene copolymers through SARA ATRP <i>Paweł Chmielarz, Piotr Król</i>	65
Elastomeric materials reinforced with cellulosic fibres <i>K. Diakowska, A. Masek, M. Zaborski</i>	73
Studies on chitosan/beetosan - based hydrogels modified with <i>Salvia officinalis</i> and bee pollen <i>Anna Drabczyk, Sonia Kudłacik, Katarzyna Bialik-Wąs, Bożena Tyliczszak</i>	81
Synthesis and physicochemical properties of acrylic hydrogels modified with starch <i>Anna Drabczyk, Bożena Tyliczszak, Krzysztof Pielichowski</i>	89
Unconventional cross-linking method of polychloroprene rubber <i>Anna Dziemidkiewicz, Martyna Pingot, Krzysztof Strzelec, Marian Zaborski</i>	95
The influence of the initial pH on the sol-gel synthesis of resorcinol-formaldehyde gels <i>Katarzyna Z. Gaca, Ewa Szefer</i>	101
Effect of composition and preparation conditions on mechanical properties of thermoplastic starch <i>F. Ivanič, I. Chodák</i>	111
Polyurethane elastomers containing polyhedral silsesquioxanes. Thermal, mechanical and biological characterization <i>Małgorzata Jancia, Edyta Hebda, Krzysztof Pielichowski</i>	117
Monitoring of photocopolymerization of trimethylolpropane triacrylate with glycidyl methacrylate using by fluorescence spectroscopy technique <i>Iwona Kamińska-Borek, Joanna Ortyl, Roman Popielarz</i>	125
Molecular dynamics and thermal transitions in PDMS/CNTs nanocomposites <i>Panayiotis Ketikis, Stefanos Koutsoumpis, Lilianę Bokobza, Dimosthenis Georgopoulos, Georgios Georgousis, Evangelia Kontou, Apostolos Kyritsis, Polycarpos Pissis</i>	133
The study of properties of polyamide 610/microfibrillated cellulose nanocomposites <i>Paulina Konieczna, Agnieszka Leszczyńska, Krzysztof Pielichowski</i>	143

Impact of POSS particles on morphology, thermal properties and molecular dynamics of polyurethane elastomers based on HDI <i>Stefanos Koutsoumpis, Konstantinos N. Raftopoulos, Jan Ozimek, Polycarpos Pissis, Edyta Hebda, Christine M. Papadakis, Krzysztof Pielichowski</i>	151
Geometry of nanospun fibers <i>Kozłowski Marek</i>	161
The effect of different additives on selected properties of polypropylene fibers <i>Vladimíra Krmelová, Maxim Puchnin, Iveta Papučová, Katarína Móricová</i>	169
Polyurethane cationomers modified by polysiloxane <i>Bożena Król, Kinga Pielichowska, Piotr Król, Paweł Chmielarz</i>	175
Acrylic bone cements modified with PEG/chitosan systems <i>Klaudia Król, Paulina Chylińska, Kinga Pielichowska</i>	183
Attainment and physicochemical analysis of chitosan/beetosan based hydrogel matrices incorporated with caffeine <i>Sonia Kudłacik, Anna Drabczyk, Katarzyna Bialik-Wąs, Bożena Tylińczak</i>	191
Synthesis and characterization of hydrogels with chitosan containing caffeine <i>Sonia Kudłacik, Anna Drabczyk, Katarzyna Bialik-Wąs, Bożena Tylińczak</i>	199
The influence of bio-components on the flammability of porous polyurethane materials <i>Maria Kurańska, Aleksander Prociak, Ugis Cabulis, Mikelis Kirpluks</i>	207
The influence of water absorption on PA 10.10/flax composites <i>Paulina Kuźniar, Stanisław Kuciel, Anna Kufel</i>	213
Modification of Oligoetherols with Carbazole and Adenine Rings for Obtaining of Polyurethane Foams with Reduced Flammability <i>Renata Lubczak, Dominik Szczęch</i>	219
Flexible polyurethane foams synthesized with different bio-polyols <i>Elżbieta Malewska, Paulina Budny, Aleksander Prociak</i>	231
Chitosan based composites reinforced with silver modified hydroxy apatite <i>Dagmara Malina, Klaudia Pluta, Agnieszka Sobczak-Kupiec</i>	239

Solar irradiation effects on the properties of ethylene-norbornene composites containing solvent dyes and stabilizers <i>Anna Marzec, Marian Zaborski, Zygmunt Boruszczak</i>	245
Elastomeric nanocomposites for sensors and actuators application <i>Mária Omastová</i>	255
The influence of POSS nanoparticles on poly(tetramethylene ether) glycol crystallization <i>Jan Ozimek, Edyta Hebda, Krzysztof Pielichowski</i>	263
Processing and characterisation of modern polyurethane powder clear coatings <i>Barbara Pilch-Pitera</i>	275
Characteristics and properties of polymer-ceramic based dispersions <i>Klaudia Pluta, Dagmara Malina, Agnieszka Sobczak-Kupiec, Bożena Tyliczszak, Katarzyna Bialik-Wąs</i>	283
Possibilities of PLA as food packaging material- nano-reinforcement and electrospinning as future perspective <i>Tanja Radusin, Aleksandra Miletić, Ivan Ristić, Branka Pilić</i>	289
Architecture effects on the morphology and segmental dynamics in Polyurethane - POSS organic inorganic hybrids <i>Konstantinos N. Raftopoulos, Stefanos Koutsoumpis, Edyta Hebda, Christine M. Papadakis, Krzysztof Pielichowski, Polycarpos Pissis</i>	297
Epoxy-polyurethane materials - novel products as an answer for growing awareness for environmental issues and consumers expectations <i>Anna Sienkiewicz, Piotr Czub</i>	307
Attainment and properties of composites based on polymeric matrices reinforced with bioactive calcium phosphates <i>Agnieszka Sobczak-Kupiec, Klaudia Pluta, Katarzyna Bialik-Wąs, Dagmara Malina, Bożena Tyliczszak</i>	317
Structure-property relationships in thermoplastic polyurethane nanocomposites containing POSS molecules <i>Krzysztof Stafin, Agnieszka Leszczyńska, Krzysztof Pielichowski</i>	325
Carbon nanofibers as reinforcing filler in elastomer technology <i>Bolesław Szadkowski, Martyna Pingot, Marian Zaborski</i>	335

Starch as a Substrate for Synthesis of Oligoetherols and Rigid Polyurethane Foams <i>Dominik Szczęch, Renata Lubczak</i>	341
Evaluation of cytotoxicity and physicochemical properties of chitosan based hydrogels modified with gold nanoparticles <i>Bożena Tyliszczak, Katarzyna Bialik- Wąs, Dorota Walczyk, Dagmara Malina, Agnieszka Sobczak-Kupiec</i>	349
Synthesis and characterization of self-healing polymer matrices based on A6ACA monomers <i>Bożena Tyliszczak, Katarzyna Bialik-Wąs, Jolanta Jaśkowska, Anna Drabczyk, Sonia Kudłacik, Agnieszka Sobczak-Kupiec</i>	355
Structure-properties relationships in vegetable oil based polyurethane coating materials <i>Joanna Wojturska</i>	361
Dose rate effects of gamma irradiation in ethylene-propylene terpolymer <i>T. Zaharescu, E.M. Lungulescu, A. M. Luchian</i>	369
Radiation processing - a versatile procedure for the modification of polymers <i>Traian Zaharescu</i>	377
Magnetic liquids for polymeric pipe tightness <i>T. Zaharescu, L. Vékás, I. Borbath, A. M. Luchian</i>	399
